

This is our new hostel building for girls. It has two storey and class 8th girl students live in it. Being new we like it very much. It is painted yellow and the rooms are spacious. There are big trees around it and at back of it there is generator room. We all girls like to visit it once every day. As our TV Room is in old hostel building senior girls go to new building for self study. We watch TV at night or on Sundays. The old building has congested rooms but it has airy rooms. We all gather in front of it for evening attendance. We have maintained a small garden in front of it. This season we had marigolds only but we will plant rose plants too. It's quite interesting to live in hostels with other

girls. We go home during vacations only. Often we feel homesick but soon overcome our feelings. This life makes us understanding and adjusting. It opens a window to new experiences of life.
