

As we live in a residential School, we have to stay here for nine months. We have activities throughout the day. If you know about our hectic schedule you will be surprised. We get up early at 5 a.m. in the morning and our day starts with morning p.t. We have breakfast at 7 a.m. sharp. Our

morning assembly starts at 8 a.m. and continues till 8.30 a.m. Like all day Schools we have 8 periods till 1.35 p.m. We have our lunch at 1.40 p.m. We are ever on move. We have afternoon studies starting from 3 p.m. to 4.30 p.m. After that we have evening games till 6.30 p.m. Our evening supervised study is continued till 8 p.m. We get dinner at 8.05 p.m. You can see we remain busy till late night. Board classes have early morning studies from 6 a.m. to 7 a.m. and late night study from 9 p.m. to 10.30 p.m. During all our activities our teachers are also with us. We have House Masters and House Mistresses who look after us, all subject teachers of our School are associated with Houses of girls and boys, beside subject teaching they have responsibilities of Houses and other

activities. But we all are happy despite so many activities. We live like a big family. House prefects help their teachers and class monitors also help class teachers. We have studies on Sundays too. But we can watch movies that day. Often we feel bored due to monotonous activities throughout the week. We often go to other Navodaya Vidyalayas for games and literary activities. We have vacation in months of May, June and December. We wait eagerly to go home during vacations. We learn a lot of things in hostel life, first thing is self-dependency. We learn to do most of our works ourselves like eating, washing clothes, study etc. Our parents are happy to see us growing in a congenial environment.

As we live far away from city, we have no distractions. We have green fields around that look so beautiful. It is said that in ancient India students were imparted Education thus. We are lucky to live in a pollution free environment. We get all facilities from Central Government of India and Navodaya Schools give good results all over India as students are exceptionally talented.
