

We see a lot of similarities in the photos uploaded by our Schools. In the first place we observe scenic beauty in every photo uploaded to our Project. We share same blue sky, same

blazing sun and air. We may be living far away but still we reside on same Earth. We all show love towards our Mother Earth. We all children are alike in our hopes and aspirations. May be we belong to different backgrounds still we are same in many aspects. We crave for earthly joys and our sphere is limited but we are expanding our horizons. We all want Peace on Earth and a safe future for us. We care for our environment and love seeing greenery of Nature. Most of our dreams are alike and our basic nature is same.

We have slight differences too that are obvious but don't matter much. We live in a remote area away from city amidst fields. Your School is surrounded by big buildings and has very good infrastructure. We live in residential set up whereas you are day scholars. We live away from our families and you are lucky to be near your family members.

We have become self- dependent and like doing all our works ourselves. We often feel home sick but it may not be the case with you. We seldom have contact with outside world. We have no distractions here. Ours is a desert sandy area and a fewer trees grow here still we managed to grow many varieties of trees here. We have very hot summers here. We find enough time for nature watch as we can't watch t.v. We can't have choice as far as our meals are concerned because we are provided meals in our School mess. We keep ourselves busy throughout the day and may be you not having as many activities as we have. We often feel lonely as we miss homely atmosphere but we have many friends here to share our feelings with.

We would like to know how you feel about us.

Class-6th
