

eLanguages

creative collaboration for teachers globally

eLanguages is a new online collaborative programme enabling you to work in partnership with counterparts around the world, share authentic resources and build reusable curriculum-relevant projects which you can present to the world.

'It's brilliant! I've been looking for a set of web tools for school links for the last two years. I've found many of the tools that eLanguages offers on a variety of other sites, but never all under the same roof. Even better, the instructions on how to use it are in the native language of the user.'

Alex Savage

Advanced Skills Teacher
Notre Dame High School, Norfolk, England

- funded and supported by the Department for Children, Schools and Families
- free and simple to use
- support in getting started and finding a partner
