

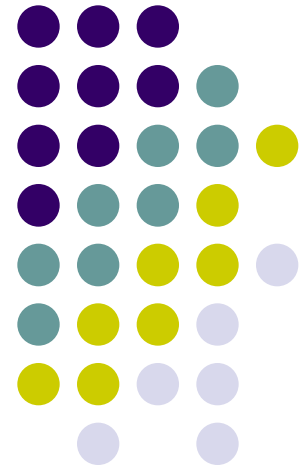

Photovoltaic Project

Sisters of Notre Dame de Namur
Congo-Kinshasa & Nigeria, Africa

What is our dream for the future?

We dream of building similar systems in Lemfu, Kitenda and Pelende, Congo.

We dream that through the use of the communication system new opportunities will be available to the students of the primary and secondary schools in Lemfu, Kitenda and Pelende.

We dream that the water carried from the river will be purified and therefore help to prevent illnesses and death.

We dream that old water systems will be upgraded.

We dream of students learning to sew who will be using machines run by electricity.

We dream of clean water, electricity and a communication system that will allow doctors and nurses to provide better health care in all 3 clinics.

The Sisters dream of having electricity and eliminating the task of ironing with a charcoal iron!

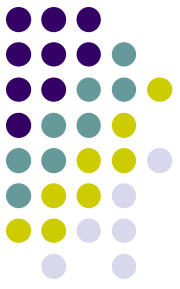

This project helps us to fulfill these Chapter Calls:

- We are called to be one.
- We yearn to deepen our fundamental commitment to stand with our sisters and brothers who live in poverty and accompany them in their struggle.

Can you help us to realize our dream?

- Share the story with your friends, schools and parishes
- Establish internet communication between Notre Dame schools in the US, Nigeria and Congo
- Tell us about potential funders or foundations
- Sponsor a site as a Unit
- Research links to local hospitals or maternal clinics

Un gran MERCI! from the Sisters of Notre Dame in Congo-Kinshasa
