

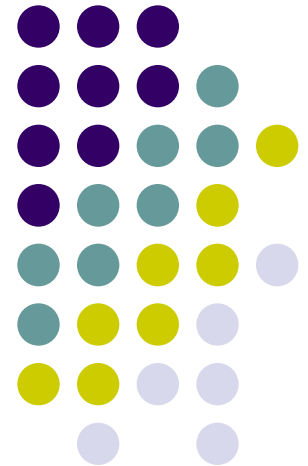

Photovoltaic Project

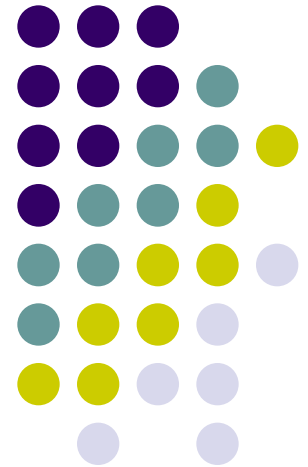

Sisters of Notre Dame de Namur
Congo-Kinshasa & Nigeria, Africa

Where does this exist?

Systems were installed in:

- Fugar, Nigeria 2006
- Ngidinga, Congo 2008
- Awkunanaw, Nigeria 2008

Construction of the sites offer many challenges. Just getting to the site may take a bit longer than expected!

Materials are shipped in wooden crates and carefully unpacked on site.

Trenches are dug for the cables.

The panels are carried to the roof for installation.

Installation continues.

The sisters are committed to learning everything about the Photovoltaic System.

All is ready on the roof.

Co-workers are also involved and are learning all about the project.

The batteries are connected and ready.

Last minute adjustments are made.

Sister is happy that the project is completed and all is working!

The project would not be complete without a ribbon cutting and a blessing to inaugurate the Project
